

# **Hurricane Irma Impact on Tile Roofs on Marco Island September 2017**

## Marco Island, FL. 115 – 130 MPH winds on 9/10/17

Mechanically fastened tiles are no match for the wind

# Marco Island, FL. 115 – 130 MPH winds on 9/10/17

Mortar set  
tiles didn't  
fare any  
better....

## Marco Island, FL. 115 – 130 MPH winds on 9/10/17

While adjacent adhesive fastened tile roofs withstood the storm

## Advantages of tile roofs fastened with TILE BOND™

- ❑ Provides a more secure roof than mechanical fasteners since it eliminates chattering. (See Wall of Wind videos)
- ❑ Typically has 2 – 3 X uplift force of mortar set tiles. (Per NOA's)
- ❑ Easy to install, no mixing. Saves time over mortar set tiles.
- ❑ Minimizes liability issues in wind events due to tiles becoming projectiles.
